DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

1. Claims 1-62, drawn to compositions comprising first and second nucleic acids sequences encoding truncated A and B subunit coding regions obtained or derived from a bacterial ADP-ribosylating exotoxin, wherein each coding region has a 5' deletion and fails to encode an amino terminal bacterial signal peptide, classified in class 536, subclass 23.7.
2. Claims 63-80, drawn to methods of enhancing an immune response, classified in class 514, subclass 44

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the composition could be used for purposes other than enhancing an immune response, such as studying the structure and function of the encoded A and B subunits. The compositions could be used to deliver expression vectors to expression systems *in vitro* for production of the encoded proteins for subsequent physical and kinetic characterization.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification and their

Art Unit: 1635

recognized divergent subject matter, and because each invention requires a separate, non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Any inquiry concerning this communication or earlier communications from the examiner(s) should be directed to Richard Schnizer, whose telephone number is 103-306-5441. The examiner can normally be reached Monday through Friday between the hours of 6:20 AM and 3:50 PM. The examiner is off on alternate Fridays, but is usually in the office anyway.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Leguyader, can be reached at 703-308-0447. The official central fax number is 703-872-9306. Inquiries of a general nature or relating to the status of the application should be directed to the Patent Analyst Trina Turner whose telephone number is 703-305-3413.
